STG - (A) United States patent
AB - A small, lightweight, high intensity illumination assembly for use
 in dental and medical applications. The illumination assembly
 includes attachment means for removable attachment to headgear
 such as eyeglasses, face shields, or headbands, and lenses,
 loupes, and binoculars associated with such headgear. The
 illumination assembly is able to achieve extremely light weight by
 using only a single optical element therein, e.g., an aspheric
 condensing lens, binary optical element, or holographic optical
 means, and by piping illumination to the optical element from a
 remote light source by use of a flexible light guide, e.g., a
 fiberoptic bundle.
